SUMMARY

Software Engineering student (7th semester) and aspiring Flutter developer with intermediate Flutter and Dart skills, formal Flutter training, and a Flutter-based final year project in progress. Hands-on with REST APIs, asynchronous programming, Git/GitHub, and web development experience from an internship at Apimio. Motivated to build cross-platform Android and iOS apps from scratch under the guidance of an experienced development team.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Flutter widgets, layouts, navigation, UI development, cross-platform (Android/iOS) apps
APIs and Async: REST API integration, asynchronous programming (async/await, Futures), JSON handling
Version Control: Git, GitHub (branching, commits, team collaboration)
Languages: Dart, Python, JavaScript, C++
Backend and Web: FastAPI, Node.js, React.js, HTML, CSS, SQLite
AI and Cloud: LLM integration (Google Gemini API), Prompt Engineering, NLP, Google Cloud Platform (GCP)

PROJECTS

AI Travel Planner (Final Year Project) | Flutter, Dart | In progress
- Building a full-stack, AI-powered travel planning application with Flutter; core mobile UI and features approximately 40-50% complete.
- Designing multi-screen layouts, navigation flows, and reusable widgets, and integrating the app with backend REST APIs.
- Working in a 3-member team using Git and GitHub for version control.

Go Drive - Car Booking System | Academic Project
- Designed and developed a car booking system covering the complete booking workflow for users.
- Applied software engineering practices including requirements analysis, system design, and testing.

Student Help Chatbot | Python, FastAPI, SQLite, Gemini API | 2025
- Built a full-stack AI chatbot answering student queries using FastAPI, SQLite, and Google Gemini with keyword-based RAG.
- Delivered as a self-contained, easily deployable application with an embedded HTML/JS frontend.

EXPERIENCE

Web Development Intern | Apimio, Islamabad | Jul 2025 - Sep 2025
- Developed and deployed responsive web applications with HTML, CSS, JavaScript, React, and Node.js on live production features.
- Integrated front-end with back-end APIs and debugged live issues to improve reliability.
- Used Git/GitHub for team-based collaboration; gained exposure to deployment on Google Cloud Platform (GCP).

Freelance Developer | Self-Directed AI and Software Projects (Remote) | 2023 - Present
- Built backend APIs and LLM-powered applications using NLP, Generative AI models, and prompt engineering to automate workflows.

EDUCATION

BS Computer Software Engineering | Arid Agriculture University, Rawalpindi | Aug 2023 - Aug 2027 (Expected)
CGPA: 3.2 / 4.0

TRAINING AND CERTIFICATIONS

- Flutter Course - Sky Coaching Academy, Shamsabad (intermediate-level Flutter and Dart)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Machine Learning / Deep Learning - NAVTTC
- Generative AI - Professional Certification
- Foundations of Cybersecurity (Google/Coursera); Build Wireframes and Low-Fidelity Prototypes (Google/Coursera)
